

LG Home Battery RESU

Powering Australian homes
with the world's most
innovative battery technology

Get the most out of your solar with Australia's preferred home battery

Reliable technology

World's number 1 provider of EV batteries

Over 3.5 million hybrid and electric vehicles worldwide are powered by LG Energy Solution lithium batteries. The world's leading automotive manufacturers choose LG Energy Solution for our high reliability, innovative space-saving technology and unparalleled safety record.

This same technology is available to reliably power your home.

Ground-breaking technology

Power for our world
and beyond...

We've been pioneering lithium-ion
battery technology since 1995

Not only do we power hybrid and electric
vehicles and homes, our battery technology
meets the stringent standards required to
reliably power NASA spacesuits.

We're bringing our reliable and efficient
technology to Australian families to power
their homes.

The perfect battery for your home

With our broad range of options and inverter integrations, your installer can design a system perfectly tailored to your needs.

The solar installers' battery of choice

Installers prefer working with the LG Home Battery thanks to our flexible, scalable solutions, reliability and Australian service team.

The LG Home Battery can be wall or floor mounted and is small and compact making it much easier to comply with Australian BESS Standard AS5139.

Founded in 1947

As a long-established company we have the standards of quality, service and support you can rely on.

LG products feature in many homes and have earned the trust of millions of Australians

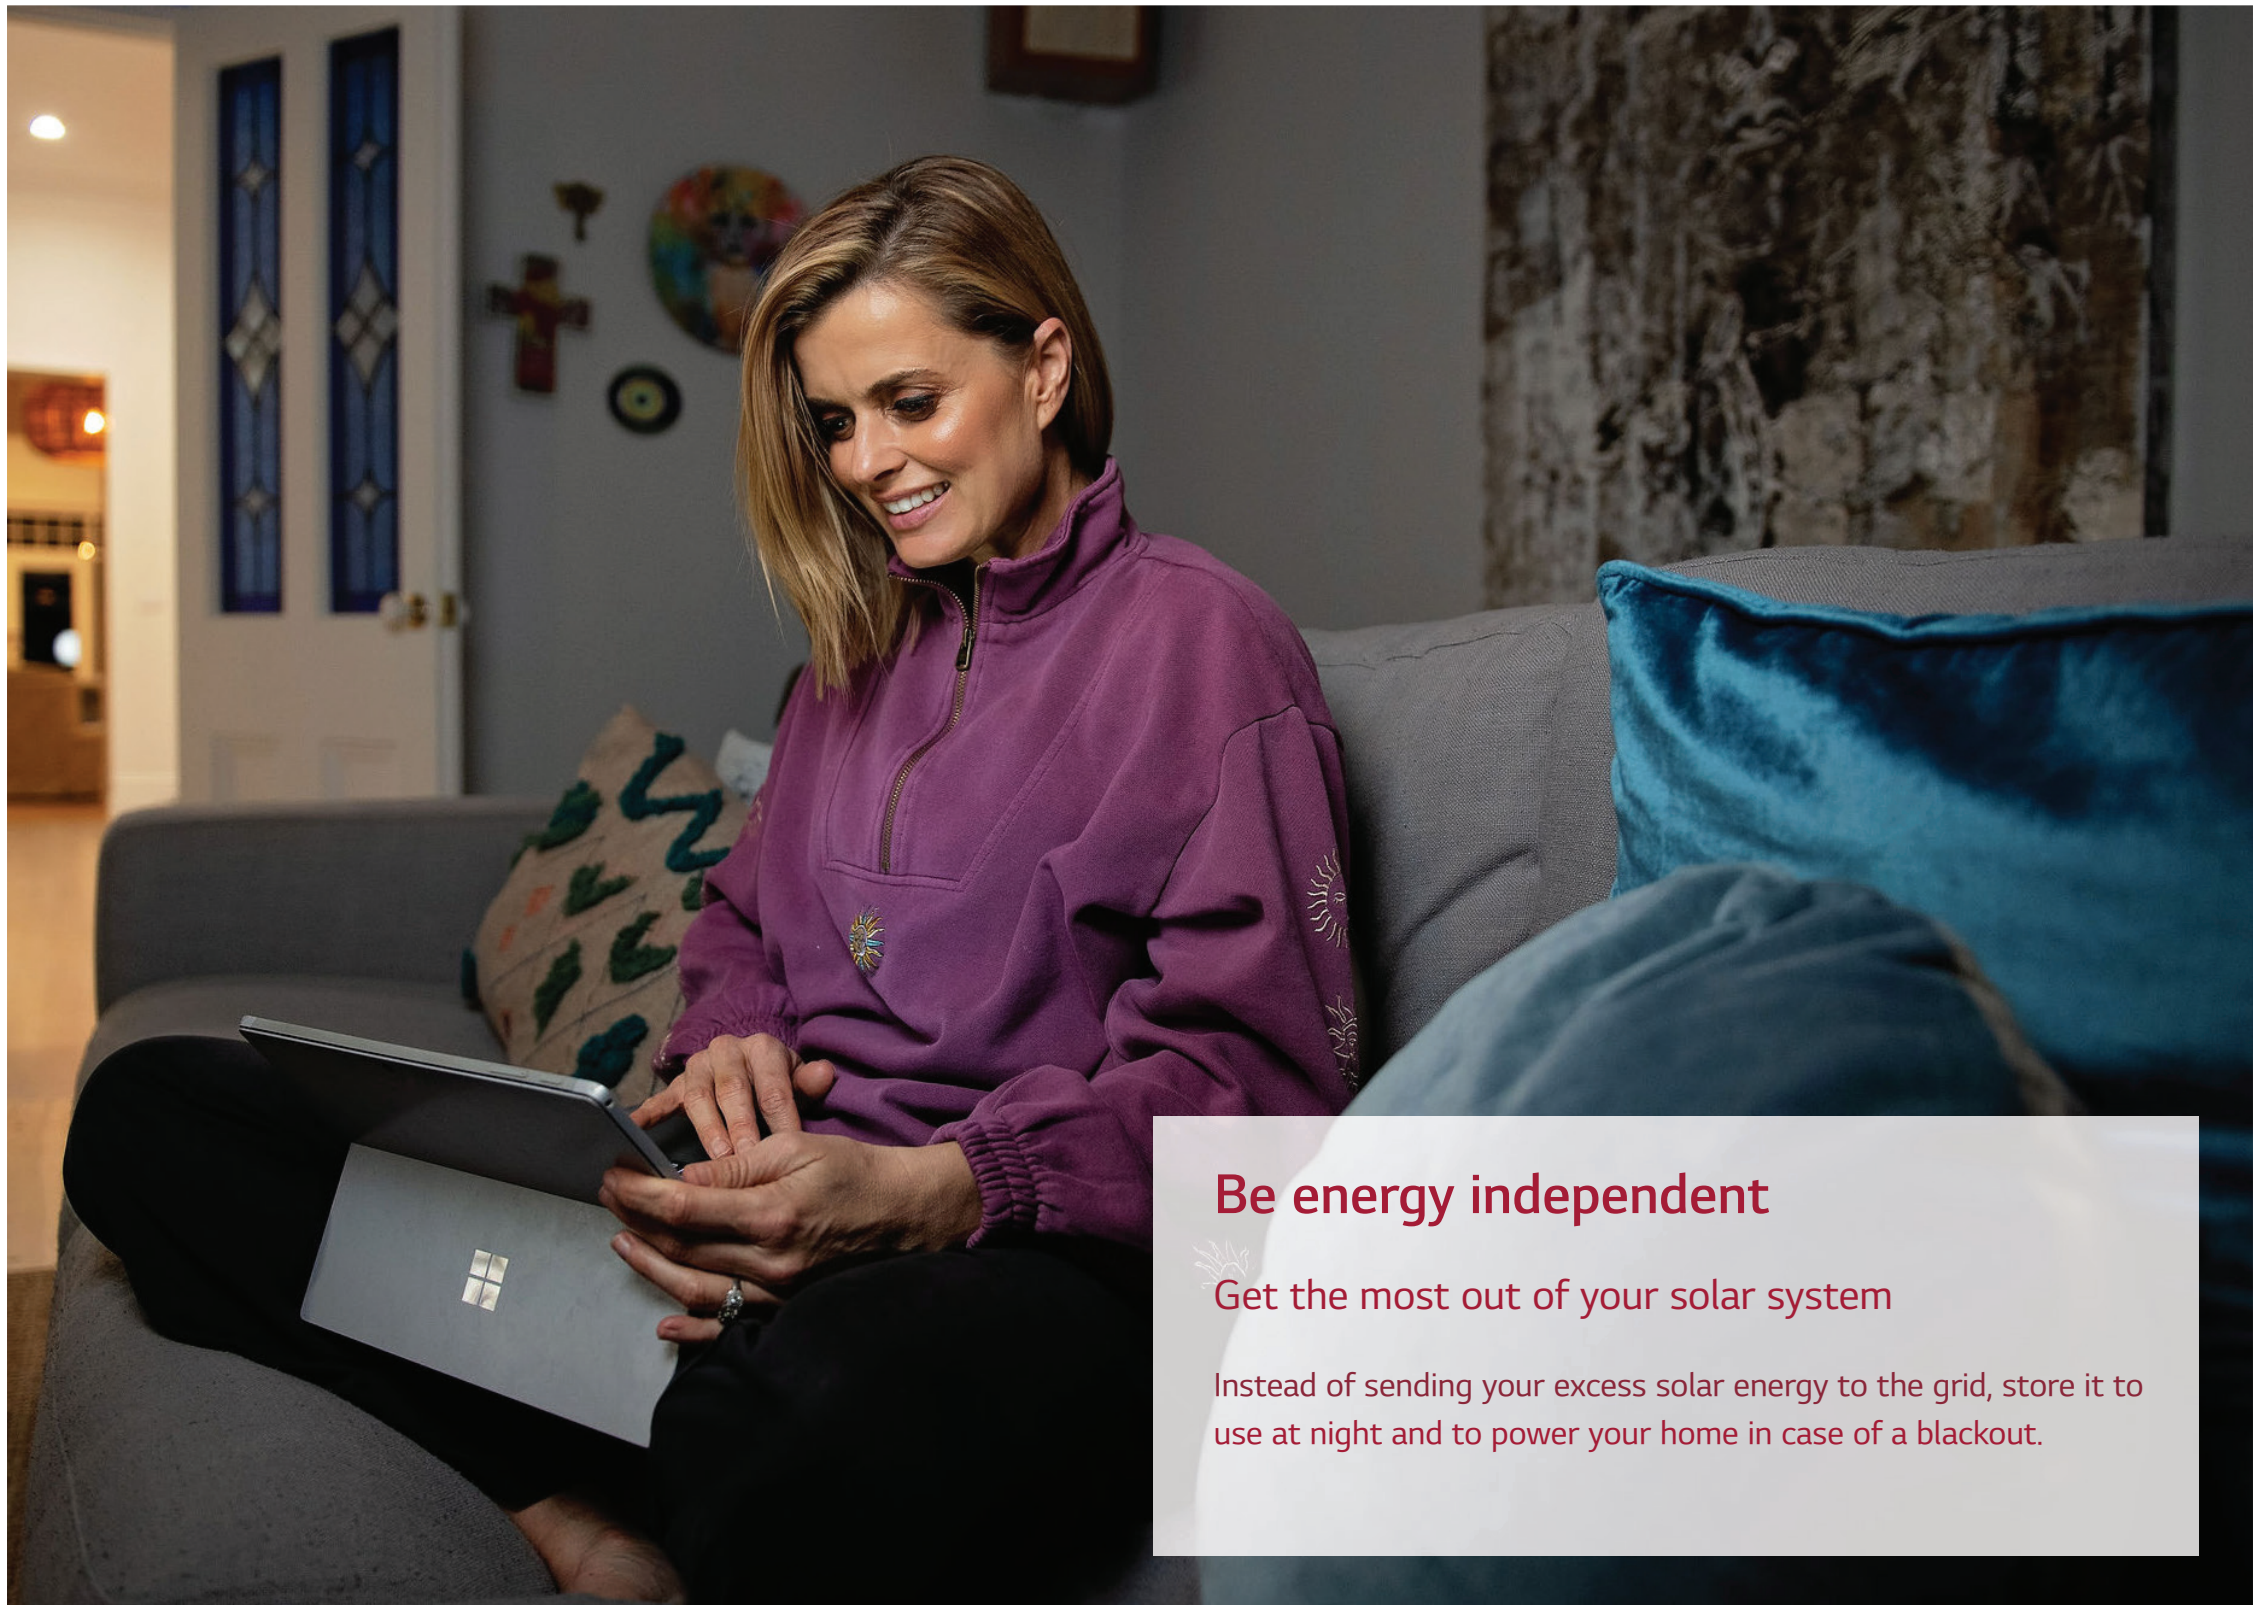

Compact and sleek

Our sleek design fits perfectly into any home.

With a range of compact sizes and wall or floor mounting options you can put the LG 'RESU HOME' Battery and Inverter out of the way.

Our pioneering engineering means you get ultimate performance and reliability.

Be energy independent

 Get the most out of your solar system

Instead of sending your excess solar energy to the grid, store it to use at night and to power your home in case of a blackout.

The ultimate in flexibility

The LG Home Battery and Inverter range

Create the optimal system for your home

Our unique line-up of sizes, capacity and formats mean your installer can design the optimal system to match your needs and provide the best value from your complete LG Energy Solution solar system.

are maximising their solar by installing
the LG Home Battery

Thousands of Australians powering their homes with LG Home Battery

Angie & Tawanda
Victoria

“The RESU10 solar battery is one of the most powerful in the world for its size. Sometimes people are surprised by just how small this battery is.”

RESU10 LG Home Battery added to their existing solar system

Gideon
South Australia

“The focus was on realising a house with a high degree of self-sufficiency, which at the same time represents an economically interesting solution from a long-term perspective.”

RESU10H LG Home Battery with new solar system

David & Liz
Victoria

“We chose a RESU10H LG Home Battery and the SolarEdge inverter. Now we rest easy with the confidence of our blackout protection and low power bills year round”

Take advantage of clean, solar power

The LG Home Battery can provide up to 80% of your annual energy needs. Become energy independent and maximise your solar power.

Save money

Use your stored energy at night, reduce or say goodbye to electricity bills, and sell excess energy to offset other bills.

Blackout ready

Power through inconvenient blackout outs. Be prepared with your own source of power and keep your home and family safe.

Reduce carbon footprint

Power your life with free renewable energy from the sun and make the future a brighter place.
